CBMI Construction Co., Ltd.

MMG OVERVIEW

The MMG Plant of CBMI Construction Co.,Ltd., following the technical route of "modularity, pre-assembly and movable" and taking the philosophy of "less investment and faster economic returns", partners with the world-famous companies and provides premium service.

MMG CHARACTERISTICS

Standing cement grinder is used, which is featured by small floor space, low energy consumption and noise.

Delivered in the one-stop service model that includes product design, supply, installation and debugging.

Control product quality via modular equipment and prefabrication in the factory in China, which ensure easy installation and uninstallation on the site.

Key equipment is the world-famous brand, which has reliable and easy operation and maintenance.

Short period of on-site installation and commissioning; short deliver period.

Applicable for land use in undeveloped or redeveloped regions.

Adapt to critical natural environment in the world.

ADVANTAGE

INSTALLATION PERIOD

Effectively shortening the installation period by 56%.

FLOOR SPACE

Reducing the engineering occupation area by 43%.

PERIOD OF DELIVERY FOR PRODUCTION

The period of delivery for production of the MMG Plant is less than 12 months.

INVESTMENT COST

Effectively saves more than 20% of the cost of investment for you.

MMG OVERVIEW

MMG Plant equipment and parts, after they are integrated and pre-assembly in the modular way in the factory in China, can be shipped to regions across the world in containers, etc. for the purpose of local assembly.

By means of modular integration, pre-assembly process control and on-site assembly, MMG Plant can effectively shorten period of installation and save the cost.

MODULARITY AND MOVABLE

MMG Plant, which has the modular design, is not only featured by compact technical structure, functional integration, small floor space and easy installation.

But also, it can be uninstalled, packaged and transported in the modular way, thus reassembled for production in another place. In this way, the grinding station can be removed for the purpose of reuse so as to secure resource allocation by clients.

ENGINEERING

3D design service, BIM standardized design platform to help customize service.

PROCUREMENT

Global procurement, resources sharing.

EPC⁺

Providing customers with one-stop engineering services makes customers experience more intimate and comprehensive services.

CONSTRUCTION

'Smart Construction', the excellent project site management ability optimizes the construction time schedule and cost.

+VALUE-ADDED SERVICE

Assist with financing, operation & maintenance, spare parts, etc. to maximize customers' concerns.

**CENTRAL AFRICAN
CEMENT COMPANY LIMITED**

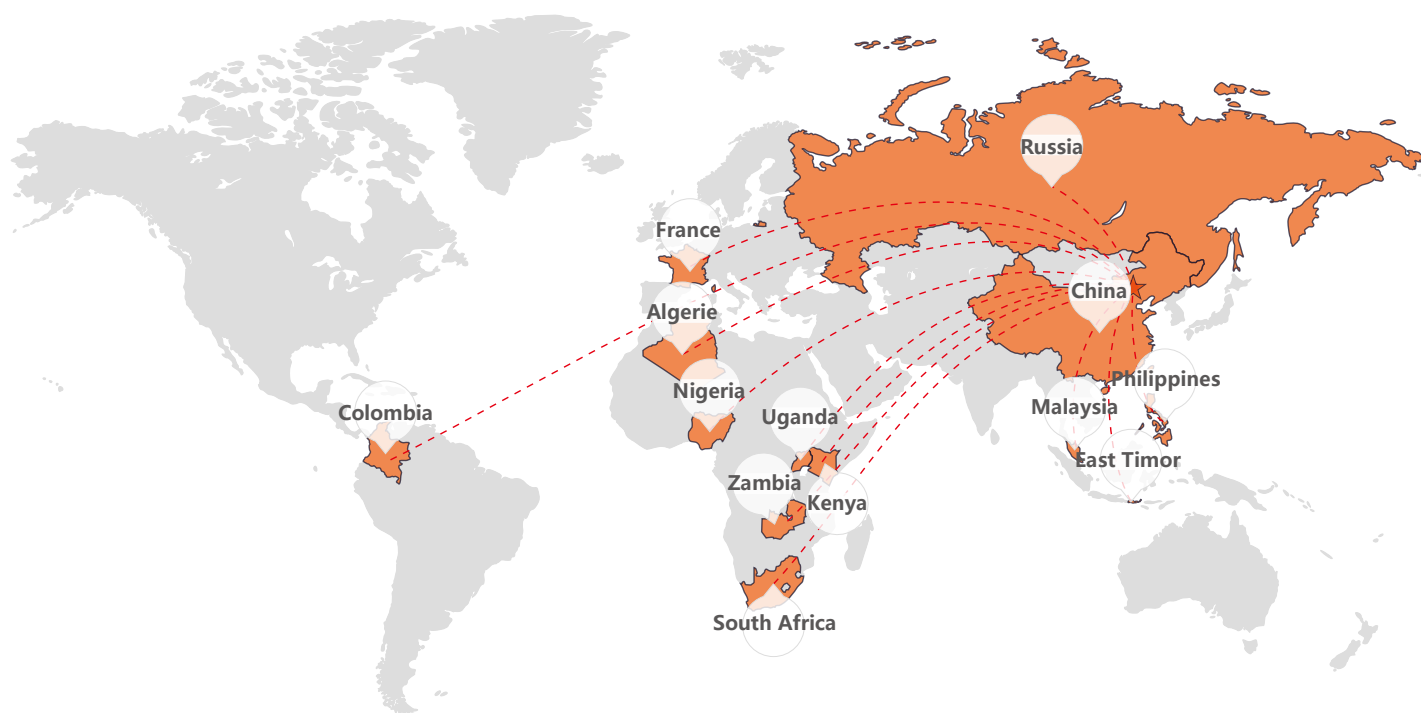

The project is progressing normally according to the contract and is being financed through CITIC.

LOCALIZED SERVICE

CBMI Construction Co., Ltd. actively fulfills the philosophy of international and localized operations.

Till today, it has set up 13 branch companies in the world, which provide the most considerate and convenient after-sales service to clients so as to help boost MMG Plant to the largest extent.

These branch companies are able to provide operating service to meet the various demands of clients.
